To Whom It May Concern,

I began seeing massive symptom relief 9 years ago in my battle against a life-threatening case of Crohn's/Colitis. Natren was the only probiotic supplement I trusted and used to obtain these results without potential risks in such a fragile state of health.

Since healing myself, I have remained drug and surgery-free for the past 8 years while helping thousands of others around the world achieve similar results. We currently consult over 150 unique IBD clients per week from around the world of all ages, all cultures, and all extremes of disease. However, we only use 1 kind of probiotic supplement to serve all the needs of our unique community, Natren probiotics.

Natren is crucial to the complex strategies and protocols needed to help restore a person's gut integrity. We must use one single strain at a time that can survive the stomach acid, safely partner with our microbiome, and properly cultivate throughout the G.I. tract with minimal to no risk of negative reaction. There is no other probiotic company or formula that meets the rigorous criteria needed to measure Natren's standards and we implore you to help maintain the integrity and authenticity of Natren probiotics.

We currently drop ship our orders from the Natren warehouse in Westlake Village, CA to assure product viability. We use partners across Europe and Australia as needed with sales and returning IBD customers steadily growing each year despite the pandemic.

The IBD issue along with various forms of gut diseases is growing rapidly into an epidemic. Only the most authentic probiotics will continue to rise with evergrowing value in times of uncertainty. We will continue to only use Natren Probiotics to serve our growing community and our expanding global solutions.

Sincerely,

Dane Johnson, CHN
